

User Manual - Kingsleys Management Dashboard

1. How User Can Access

- **Registration:** Users can sign up via the signup page (/signup). A valid email, username, and password are required.
- **Activation:** Upon registration, an account starts in a **pending** state. An automated email is sent to the Admin, who must approve and activate the account.
- **Login:** Once activated, users can access the dashboard by navigating to the login page (/) and entering their credentials. A secure token maintains your active session.

2. How User uses the site (Normal User)

- **Dashboard View:** Upon login, normal users (Staff or Store Managers) are presented with their personalized Dashboard.
- **Modules Access:** The dashboard displays available modules (like Online Ordering, Invoicing, etc.). Normal users will only see modules assigned explicitly to them as active; the rest will show a "Locked" padlock icon.
- **Interaction:** Clicking an unlocked module card either opens a preview popup or opens the tool in a new browser tab.
- **Profile:** Users can navigate to "My Profile" in the sidebar to update their personal information or change their password.

3. How the Admin Works / Usage

Admins have full privileges to manage the entire application. The **Admin Panel** provides several features:

- **Manage Users:** Admins can view all users, filter by active/pending/roles, and perform actions like Edit, Deactivate, or Delete.
- **Activate Accounts:** Admins review pending signups and approve them, instantly triggering an activation email to the user.
- **Assign Roles:** Admins can change a user's role (Admin, Operation Manager, Store Manager, or Staff).
- **Assign Modules:** Admins explicitly toggle which modules a Store Manager or Staff member can access.
- **Impersonation (Switch User):** Admins can seamlessly switch into another user's account to see the dashboard from their perspective, which helps in debugging module access issues.

4. How to use application

- **Navigation:** Use the left-hand sidebar to navigate between the main Dashboard, the Admin Panel (if authorized), and your Profile.

- **Search & Filters:** On the Dashboard, use the search bar to find a specific module by name, or use the "Active" and "Locked" filters to narrow down the view.
- **Logout:** To safely end the session, click the "Sign out" button located at the bottom of the sidebar.

5. Testing Credentials

To test the live web application at <https://dashboard.projectkingsleys.com/>, use the following accounts:

- **Admin**
 - Email: kokabnaveed2002@gmail.com
 - Password: 37p^&sipQBovpn
- **Operation Manager**
 - Email: kokabnaveed9702@gmail.com
 - Password: zaNz@oDkK5*2So
- **Store Manager**
 - Email: kokab.naveed.ts@gmail.com
 - Password: Wa7uRwZ7ojH4KE
- **Staff**
 - Email: kokab.naveed@techscapesolution.com
 - Password: dPwFwq3eoEXMa7
